TERMS AND CONDITIONS OF SALE

Prices. 5 and 50 of same variety and size at 10 and 100 rates, respectively.

Specimen Stock selected or marked by our customers in the nursery will be charged for according to its value, and higher than listed prices.

Terms of Payment. Cash with order from unknown customer or those who prefer to earn discount. When cash is sent with the order or paid on delivery, we will allow a 5% discount for cash. There are no exceptions to this. If remittance is by Post Office Money Order, it should be made payable to us at Mobile, Ala.

For all charge accounts our terms are 30 days net. All boxing or crating of all plants with the exception of bare-root or lining-out stock will be charged for at cost. New accounts will be opened only upon receipt of trade references, allowing time for investigation.

Transportation. Please state whether you want your shipments by Parcel Post, Express, Freight, or Motor Freight. If no instructions are given, we will use our best judgment in selecting best method of shipment. We make no charge for delivery to railroad station, but our responsibility ceases when goods are turned over to carrier, and risk and cost of transportation belong to purchaser.

Claim. All claims must be made upon receipt of stock. We will be glad to rectify any mistake made by us, but we accept no responsibility for cold damage and other damage that might occur after delivery, and the liability will at no time be more than the purchase price.

Condition of Sale. We accept all orders on condition that they shall be void should injury beyond our control befall the stock, and subject to all Government regulations affecting labor, materials, and transportation.

Prices in this list cancel all previous quotations
and are subject to change without notice

CAMELLIA JAPONICA

It is common knowledge that there is some confusion in the horticultural names of *Camellia japonica*, but we have carefully checked the blooms and general characteristics of the varieties in our large collection in an effort to eliminate any duplications. We believe that others in the trade will generally recognize the varieties we offer in this catalog by the names under which they are listed.

Camellias are not difficult to grow. Many fine old specimen plants are to be found scattered throughout the Lower South, where they have been growing for years with but little care, and thriving on practically all types of land characteristic of the region. However, they prefer and do best on a good, well-drained soil that has a slight acid reaction. Good garden soil is suitable, but it can be made better by adding leaf-mold and peat moss. In heavy, stiff soils a small quantity of sand is also beneficial.

In most soils, especially on clay lands, cottonseed meal alone, or a mixture composed of $\frac{2}{3}$ cottonseed meal and $\frac{1}{3}$ acid phosphate, is an excellent fertilizer. Other good fertilizing materials, which are likewise acid in their reaction, are well-rotted cow-manure, tankage, castor pomace, sulphate of ammonia and muriate of potash. If these materials are not available, we suggest a mixture of $\frac{1}{2}$ good garden soil, $\frac{1}{4}$ well-rotted cow-manure, $\frac{1}{4}$ peat or leaf-mold, well mixed.

The Camellia is less subject to disease and insect enemies than most other evergreen shrubs, but sometimes the foliage is attacked by scales. When this occurs, they should be sprayed with a miscible oil preparation and care taken to wet the underside of the leaves thoroughly as well as the top. Volck used at the rate of 1 part to 50 parts of water is effective.

The Camellia is the handsomest of all the broad-leaved evergreen blooming plants for southern gardens. It is long-lived and its beauty and monetary value increases rapidly as the plants grow older. The many new and fine varieties of recent introduction have added enormously to its popularity, and its use as a high-class cut-flower has opened up a much broader field for its distribution.

On the following pages we are listing a complete range of sizes, from very small plants suitable for growing on under lath or in greenhouses, to finished, well-rounded specimens for immediate landscape effects.

Camellia House showing 6 to 8-in. and 8 to 10-in. plants

Specimen Camellias in Field

CLASS A CAMELLIAS

The varieties offered in this class have been selected because of unusual merit and proved reliability under practically all conditions where Camellias are grown. Generally recognized by authorities as being the most outstanding and satisfactory of all the standard sorts.

ALBA PLENA. Snow-white, very double, good-sized flowers. Very early but a poor grower, and does not set buds when young.

BRILLIANT. Local name. An excellent variety. Large, very double, bright red. Compact grower with dark green foliage.

CHANDLERI ELEGANS. One of the largest peony-flowering Camellias. Cherry-red, with white variegations. Some are thick peony flowers with 500 petals, while others are loose peony form with yellow stamens.

DEBUTANTE (Sara C. Hastie). Delicate shade of solid pink; large peony form. A free bloomer and vigorous, upright grower. One of the best for cut-flowers.

FANNY BOLIS. Very large, semi-double, red flowers blotched white.

HERME. Very large, loose peony-form blooms of elegant shape. Pink and red variegated with white margin.

KUMASAKA. The flowers are large peony form, deep pink in color. An excellent grower and very free blooming. Late.

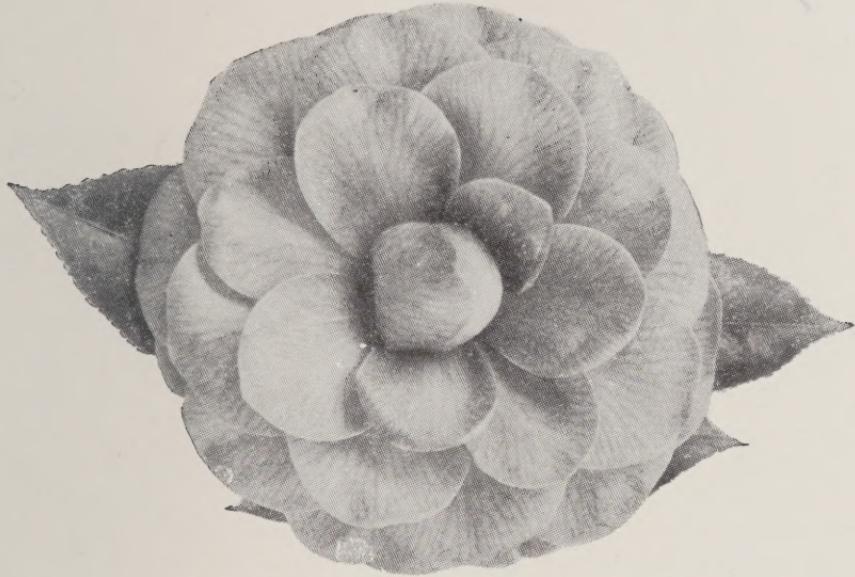

LADY VANSITTART. Large, semi-double, attractive deep pink flowers. Leaves long, narrow-pointed and slightly crinkled. Upright grower and free bloomer.

MONARCH. The deep pink flowers are of enormous size, having many clusters of stamens and petals inside of larger outer petals, making a single flower equal to a bouquet. Beautiful foliage and compact grower.

OTOME. Similar to Pink Perfection but much larger flowers, with each end of petals fading to lighter shade of shell-pink.

PINK PERFECTION. Very double, clear shell-pink flowers of dainty form, liked by many. The plants start blooming when very young, coming early in the season and continuing in profusion for a long time.

PRINCE EUGENE NAPOLEON (Pope Pius IX). Very double, scarlet flowers of good size from early to mid-season. Good, compact grower.

Prince Eugene Napoleon (Pope Pius IX)

PROF. C. S. SARGENT. Very thick, peony-form, solid crimson blooms of medium size.

RAINY SUN. Twisted, rather narrow leaves. Flowers large, semi-double and deep crimson in color.

WATERLOO (Ethrington White). Large, semi-double, pure white flowers of tissue-paper-like texture and very attractive. A profuse bloomer, even when quite young.

PROF. C. S. SARGENT

CLASS B CAMELLIAS

This class includes some of the best kinds, often as good as our A Class, but because of a little more plentiful supply, we are listing these excellent varieties at much lower prices.

CANDIDISSIMA. Star-shaped, very double, pure white flowers, not large, but a very profuse bloomer. Slow, compact grower. Season late.

ELIZABETH. Very double, white blooms with petals crinkled at end and, once in a great while, pure pink flowers of same form will appear. Leaves are very dark, thick, green. Strong grower. One of the best.

GLOIRE DE NANTES (Leana Superba). Large, semi-double, cerise bloom, with center petals often twisting. Extremely large, dark green leaves, and bold large flowers make this one of the most attractive on bush.

JARVIS RED. Deep blood-red, semi-double flowers with golden stamens. Very attractive among dark green foliage. One of the most popular kinds. Very hardy.

KELLINGTONIA. Flowers orange-red, with stripes or blotches of white, open peony type. Always blooms heavily and has extra-good foliage.

T. K. VARIEGATED. Semi-double; light pink, with darker pink margin, somewhat like Criterion azalea; elegant form and coloring, with large cluster of yellow stamens. Small leaves. Compact, but fast grower. A dependable outdoor variety.

TRICOLOR. Semi-double flowers of almost pure white to red and intermediate colors on same bush.

TRICOLOR

SARAH FROST

CLASS C CAMELLIAS

This group is composed of the more common and easily grown double and semi-double-flowering kinds. As a class, they are very fast growers and hardier than the more choice sorts.

LILY. Attractive, double, white flowers of medium size. Rapid growing, compact and symmetrical. No liners available.

ROSE EMRY. Crimson peony-form blooms of medium size, early in season.

SARAH FROST. This well-known favorite is a good compact grower and a profuse bloomer. The flowers are full double, of medium size, rose-red in color, and produced midseason to late. Very dependable.

TANNER WILLIAMS RED. Semi-double; orange-red, with prominent stamens. Very compact grower and profuse bloomer.

We also offer at this class price several very good double and semi-double-flowering kinds, names of which are not known to us. We therefore offer them by color: Red, Pink, Variegated, and White.

BESSIE MORSE BELLINGRATH

RARE CAMELLIAS

We offer a carefully selected list of choice and outstanding varieties of rare *Camellia japonica* in a wide range of colors and sizes. Many of them have already made Camellia history and others will do likewise as they become better known. They are offered in groups and priced according to individual merit.

GROUP 1

ADMIRAL NIMITZ. A recent introduction of great promise. Foliage and habit of growth similar to Laurel Leaf, and the large, full double flowers are a beautiful shade of pink.

BESSIE MORSE BELLINGRATH. This fine new Camellia has been named in memory of the late beloved wife of the founder of Bellingrath Gardens. Flowers semi-double, white with faint blush. Color is more delicate than *Magnoliaeflora*.

CHALICE (Hana-Fuki). Large, semi-double, delicate pink, with three rows of petals. The flower is more bell-shaped than Lady Clare and the color almost identical with *Debutante*. Imported by us a few years ago and has been enthusiastically acclaimed by all who have seen it.

DONCKELARI. Probably the most famous and best-liked of all the older Camellias. The flowers are large, semi-double, brick-red, flecked white, with attractive stamens in long crown. Very showy.

GLEN 40. This is one of the finest and most popular of all varieties. Large, deep red, very double and with numerous rounded petals. Beautiful and lasting.

HAKU-RAKUTEN. A very beautiful and out-of-the-ordinary Camellia. The flowers are large, semi-double to loose peony form, and pure white in color. A vigorous and symmetrical grower with smooth, attractive foliage.

SEMMES NURSERIES • Semmes, Alabama

IWANE-SHIBORI. Semi-double, cherry-red, mottled white, but with an occasional solid red flower. Conspicuous and beautiful. Rather slow, compact grower, with dark, glossy foliage.

LADY JANE GREY (Eugene Lize). This attractive seedling of Donckelari produces large pink and white variegated flowers of very lasting quality that vary in form from almost perfect double to loose peony form.

LINDSAY NEILL. A new variety that has attracted a good deal of attention in many sections. The flowers are medium to large, variegated vivid red and white. Very hardy.

ROSEA SUPERBA VARIEGATED (Margaret Sandusky). A lovely variegated form of Rosea Superba. Very large, full double, deep pink flowers with numerous small white spots or blotches. A vigorous grower, similar to Purple Emperor in habit and foliage.

ROSE DAWN. A splendid introduction by one of our local nurseries at Mobile. The large, rose-pink flowers are very beautiful and very double, similar in form and shape to Alba Plena. It is a vigorous grower, with serrated foliage, and is free blooming even when quite young.

SEPTEMBER MORN. Large, semi-double, white with faint blush of pink at base of the petals. Extremely early; usually in bloom here in late September.

ST. ANDRE. The flowers are large, peony type, blood-red and distinctive. Rich dark foliage. Very handsome.

VILLE DE NANTES. A very fine sport of Donckelari, having similar foliage, growth habits and coloring, but the petals are wavy and more irregular.

WOODVILLE RED (Martin Roberts; Kollock). Very large, brilliant red, peony type. Fast, upright grower with pale, almost drooping foliage.

LAUREL LEAF

DEBUTANTE

COLONEL FIREY

KELLINGTONIA

RARE CAMELLIAS, GROUP 2

C. M. HOVEY (*Mathotiana Rubra* Variant). In habit of growth, and shape and form of flowers, it is very much like Purple Emperor, but the beautiful, double, large red flowers are mottled white.

DAIKAGURA. Probably the earliest bloomer of all *Camellia japonicas*. In the Mobile section it is nearly always in bloom in September and often is showing color in August. Flowers large, thick peony type, deep rose color with large white blotches.

EMPEROR OF RUSSIA. A bushy and compact grower. The flowers are very large, brilliant scarlet and of peony form.

GIGANTEA. Very large leaves and spreading branches. The red and white flowers are peony form and of good size.

LAUREL LEAF. Flowers large, full double, with numerous narrow petals having recurved edges and opening very flat; light salmon-rose, marbled white.

PURPLE EMPEROR (*Mathotiana Rubra*; Purple Dawn, etc.). One of the largest flowers of rose form. Deep red but as the flower gets older, outer edge turns purple.

REV. JOHN BENNETT. Very large, beautiful salmon-pink flowers, blooming midseason to late. Semi-double.

PURPLE EMPEROR

NAGASAKI

RARE CAMELLIAS, GROUP 3

CALIFORNIA KUMASAKA. A new sport of Kumasaka, characterized by much faster growth, larger flowers and very superior variegation. Midseason. Hardy.

COLONEL FIREY (Wm. S. Hastie). Very large, extremely double flowers, with many small petals of glowing rich crimson. A late bloomer.

FRED SANDER. Flowers single, of medium size, crinkled petals, sometimes fimbriated. Otherwise, it resembles Tricolor in both color and formation.

GOSHO-GURUMA. Good-sized, semi-double, deep red, velvety-textured flowers with yellow anthers, making a most attractive color combination. Upright grower.

KUMASAKA, VARIEGATED. Large, peony-form blooms of deep pink but with white spots. Very hardy.

LADY CLARE (Empress; Grandiflora Rosea). Immense, single pink flowers. Probably the largest of all Camellias.

MONJISU (California Donckelari). Semi-double, medium-sized flowers of bright carmine with a satin-like sheen. Foliage small, dark green.

MRS. CHARLES COBB. Large, semi-double, dark red (almost black), with rich golden stamens intermixed in petals. Fast, upright, symmetrical grower. Midseason.

NAGASAKI (Mikenjaku; Candida Elegantissima). One of the most striking of all the Camellias. The very large, semi-double flowers, with prominent stamens, have thick, wavy petals, ranging in color from white to deep red.

RARE CAMELLIAS, Group 3, continued

PINK STAR. Semi-double to peony form. Pleasing rose-pink, large round petals. Growth habit compact and upright. Attractive dark foliage. Midseason. Hardy.

PURITY. Very double, symmetrical, pure white, star-shaped flowers. One of the best of all whites. Upright grower.

REV. JOHN G. DRAYTON. Medium-sized, peony-type flowers of soft clear pink. Entirely different from the variety known by this name on the Pacific Coast, which is clear white, and which is known in the southeastern United States as Grandiflora Alba and Alba Superba.

SGT. BARRIOS (Semi-Double Rosea). A fine seedling which originated here in our nurseries. Compact and upright in habit, with immense semi-double, rosy red flowers. The fastest-growing Camellia we know.

VICTOR EMMANUEL. Flowers very large, deep red, peony form, and of indescribable beauty. A splendid variety. Late.

Azalea Lath-house

AZALEAS

Azaleas are, without doubt, the most beautiful flowering plants we have in the South. Their season of blooming is very long, beginning with winter-flowering Vittata Fortunei and extending into June when the pretty dwarf Macrantha is covered with its soft orange-pink blossoms. All Azaleas are profuse bloomers, and in the spring each plant is a solid mass of color.

All types of Azaleas are easily grown, if a few rules are followed. They require a good, well-drained soil that has a slight acid reaction. The addition of leaf-mold, peat, and, in very heavy, stiff soil, a small quantity of sand, is always beneficial. Leaf-mold and peat help maintain an acid soil and a mulch of leaves is good to retain moisture and to furnish plant-food for the next year.

Partial shade is desirable in planting, but dense shade should be avoided. A lath-house is well suited for growing plants in nursery. They should be fertilized sparingly; a light application of cottonseed meal about three times a year is one of the best treatments.

Transplant-size Azaleas offered here were rooted last spring and planted in beds early in summer, giving plenty of space for full development of strong root systems and bushy tops, and are far superior to $2\frac{1}{2}$ -inch potted plants, having roots enough to fill a 3-inch pot which has twice the capacity of a $2\frac{1}{2}$ -inch pot. These small Azaleas are very tender and should be protected against frost this winter. We will be glad to book orders and reserve the plants until spring when danger of freezing is over.

Prices on all our Azaleas are based on shipping without using burlap about the roots. They can be safely shipped and transplanted in this way, and the saving in labor and material costs enables us to offer these plants at such reasonable prices.

AZALEA HINODEGIRI

KURUME AZALEAS

This group, known botanically as *Azalea obtusa japonica*, includes varieties that are more dwarf in their habit of growth and not quite so hardy as the Hardy Japanese group, but all Kurumes will stand the winters of almost all sections of the Southern States without any protection, and much farther north with a little protection. Their popularity is increasing rapidly as they become better known, especially in the cooler sections of the country where the more tender Indicas are injured by cold. Used singly, or in groups by themselves, or in combination with Indicas or Hardy Japanese varieties, they give most pleasing landscape effects and a range of color that could not otherwise be obtained.

The demand for Kurume Azaleas as pot-plants from eastern and northern florists has been growing by leaps and bounds. When plants are received from us, all you have to do is to pot them in light peaty soil, keep in moderately warm houses, spray with strong force of water daily to keep down red spiders and they will come into full bloom in about 60 days. They are a very quick and profitable crop. We are now growing thousands of excellent Kurumes for florists' use, paying particular attention to the leading florists' varieties, such as Coral Bells, Salmon Beauty, Hinodegiri, and Snow.

BRIDESMAID. Big salmon-pink flowers borne in large clusters. Very good grower.

CHRISTMAS CHEER. Compact grower with small shiny leaves. The flowers of deepest crimson are small but very attractive. One of the best varieties.

KURUME AZALEAS, continued

CORAL BELLS. Compact grower with small, round, glossy leaves. The dainty, bell-shaped, pink flowers are not large but it is a very profuse bloomer and one of the most popular varieties with florists.

DOUBLE MAUVE. Compact grower with delicate mauve hose-in-hose flowers, fading to white in center. Very nice for pot-plants.

HEXE (Firefly). Slow, compact grower with showy, deep scarlet, hose-in-hose flowers.

HEXE DE SAFFALERE. Improved type of Hexe. Large, crimson-red, hose-in-hose. Very compact; good foliage.

HINODEGIRI. Slow, compact grower, but its fiery red flowers will literally smother the entire plant, even when they are very small, making it one of the most desirable pot-plants.

HINO-CRIMSON. Similar to Hinodegiri. Very fast grower. Brilliant scarlet flowers. Hardy.

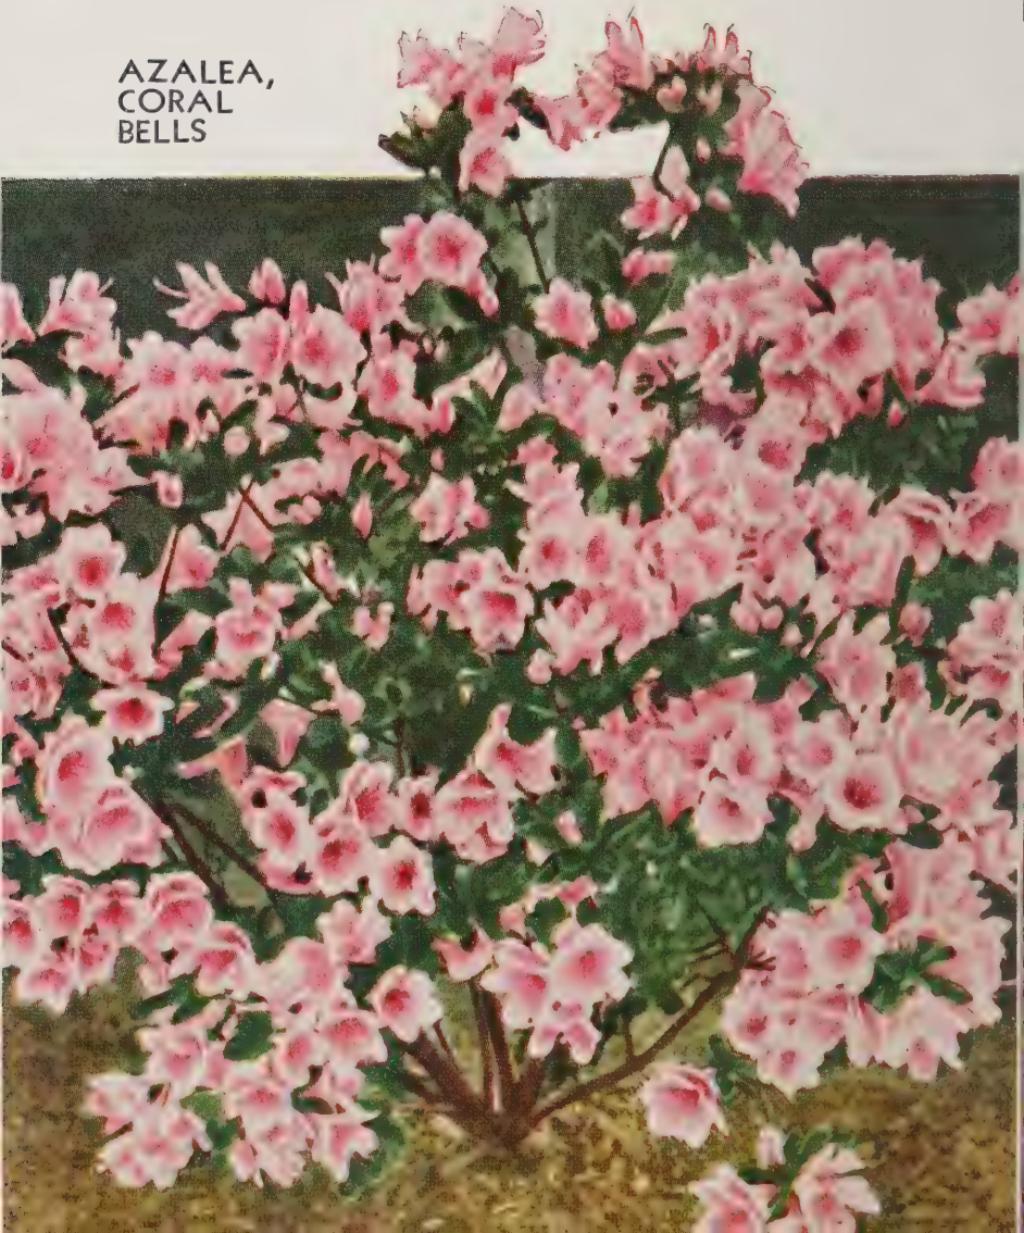

MAUVE BEAUTY. Flowers of a delicate mauve shade which literally cover the entire plant. Compact, dwarf grower.

PEACH BLOW. One of the fastest-growing Kurumes. Medium-sized, single flowers of a delicate peach shade.

PINK PEARL. Large, most beautiful pink blooms, shaded lighter toward center, with prominent markings, borne in large clusters.

SALMON BEAUTY. Large, hose-in-hose, salmon-pink flowers and light green foliage.

AZALEA,
CORAL BELLS

Salmon Beauty

Snow

KURUME AZALEAS, continued

SALMON QUEEN. Large, single, salmon-pink flowers produced in great profusion in midseason. One of the most attractive Kurumes.

SNOW. Good-sized, hose-in-hose flowers of purest white among beautiful glossy leaves. Liked by all.

*Our 4 to 6-inch bed-grown Kurume, Pericat and 6 to 8-inch bed-grown Indica Azaleas are recommended and sold to nurserymen and florists only for the purpose of lining out and growing on into larger sizes. They do not have flower-buds and are of no value for immediate effect.

We grow and sell thousands upon thousands of these small plants every year, and, due to our facilities for quantity production, customers find it cheaper and more satisfactory to purchase from us than to maintain a propagating department for their own needs.

**4 to 6-in. and 6 to 8-in. bed-grown Azaleas
shown with 3-in. pot**

Everyone in the Lower South is thoroughly familiar with the magnificent beauty of Azaleas in full bloom, but many growers in other sections have not realized that there are so many hardy varieties that can be successfully grown outdoors in their own states. New and hardy types of Azaleas are being developed each year, and soon

large plantings will be in evidence in many parts of the country not heretofore considered suited for these plants. The garden pictured above is located in New York State, and produces a wealth of color in early spring that would be almost impossible to obtain at any cost with any other plants.

AZALEA KAEMPFERI

HARDY JAPANESE AZALEAS

The following list of Hardy Japanese and Kaempferi Azaleas covers probably a larger collection of real money-making varieties for the nurserymen and florists of the southern half of the United States than any other group of plants. All of them are hardy, and all are evergreen except a few which lose their leaves in the New England States. The color-range is large—white, pink, salmon, orange, red, lilac, variegated—and the blooming season is an extended one. Some are early, some are late—each producing characteristic bloom of its own.

The whole country is tired of evergreens and common flowering shrubs alone. Everyone wants bright colors early in spring, and something different. What is better than this group of Hardy Evergreen Azaleas? Most nurserymen in this large section of the country do not realize how greatly their trade will be stimulated by offering this bright-flowering plant to their customers.

Azaleas under this heading are not dwarf like Hino-degiri or Kurumes, but are fairly fast growers, reaching an ultimate height of 10 to 12 feet, and are hardy in all parts of New Jersey and even farther north.

AMœNA. One of the hardest, compact growers, with small leaves and rather small rosy purple hose-in-hose flowers. Can stand a great deal of neglect.

HARDY JAPANESE AZALEAS, continued

FLAME. Bright orange-red flowers early in season. This is one of the best of this group. Very showy, with good foliage.

HARDY FIREFLY. Compact-growing, very hardy Azalea, with good-sized single flowers of most brilliant fiery red. One of the very best.

JUDD. A vigorous grower with large, hose-in-hose orange-colored flowers. Hardy. Midseason to late.

KAEMPFERI. This Evergreen Azalea will lose its leaves farther north, where it can stand the winters of Boston without any protection, and does splendidly in the Lower South, making large plants. The big, single, rose-pink flowers are borne profusely rather late in season. **Kaempferi Hybrids:** *Fedora*, *Othello*.

LILACINA (Akebono, meaning "dawn"). Delicate lilac shade of orchid—the color of the eastern sky at dawn. Strong grower with large leaves.

MACRANTHA. Compact grower with roundish leaves and single, medium-sized, pink flowers late in season. Very hardy. Here in Mobile this variety usually blooms in May and June, thus extending the Azalea season.

MACRANTHA, Orange-Red. Similar to above, with narrow leaves and orange-red flowers. Very good. Blooms late, at same time as the pink Macrantha.

MACRANTHA, Double-flowering. One of the above type, with double pink flowers of good size. Late blooming; very hardy. This group of Macranthas is becoming more popular every year.

MAXWELLI. Leaves and flowers are as large as most of the Indicas and the carmine-red, single flowers are big and very attractive.

SHERWOODI. Beautiful orchid color. Hardy, profuse bloomer and a strong grower.

AZALEA INDICA ELEGANS

AZALEA INDICA

The Indicas, which are fast growers with masses of large flowers, are especially adapted for landscape planting all along the Gulf Coast up the Atlantic seaboard to North Carolina. Around Mobile, Charleston, and some other sections, there are plants seventy to one hundred years old, with a spread from 20 to 30 feet across, apparently without any special care, showing they are perfectly at home and easy to grow. Nurserymen in this entire section have a wonderful opportunity to give lasting satisfaction to their customers, and incidentally enrich themselves, by planting extensive collections of these showy plants in their nurseries, because Azaleas will sell themselves when your customers see them in full bloom. We are listing the most important varieties, eliminating weaker growers or inferior flowers when the same color can be had in better varieties.

BRILLIANT. A good grower with small, dark green leaves. Deep watermelon color, being intermediate between Pride of Mobile and Pride of Dorking. Very good variety.

COCCINEA MAJOR. Brilliant orange-red. A little taller grower than Prince of Orange.

ELEGANS. Fast and rather upright grower, similar to Formosa, with light-colored pink flowers early in season.

FIELDER'S WHITE. Large, pure white flowers early in season. A strong grower, free blooming, and one of the best whites.

FORMOSA. Very fast grower with large dark leaves and big purplish pink flowers which have less purple than Phoenicia.

GEORGE FRANC. Early bloomer with extra-large salmon-pink flowers having deep red throats. Very showy.

AZALEA INDICA, continued

GEORGE LINDLEY TABER. Soft lavender-pink, faintly streaked darker pink and mottled cerise. A rapid grower and resistant to cold. Midseason.

GLORY OF SUNNINGHILL. Compact grower with shiny narrow leaves and vivid orange-red flowers. One of the latest to bloom.

INDICA ALBA. Rather upright grower, with dull-colored, hairy leaves and pure white flowers in midseason. Very hardy.

IVERYANA. Similar to Criterion, but has pink stripes on pure white instead of the pink ground of that variety.

JUDGE SOLOMON. A sport of Formosa, having same foliage and habit of growth, but the blooms are almost identical to Pride of Mobile in color.

MME. DOMINIQUE. One of the largest Indicas, similar in color to Criterion, but of taller growth. Very compact and blooms almost as late as Macrantha. Exceptionally hardy.

PRESIDENT CLAY. Good grower with orange-red flowers in midseason.

PRIDE OF DORKING. One of the deepest reds of the entire group. Blooms late in the season and, while not very hardy, is yet one of the best.

PRIDE OF MOBILE. The best-selling and most popular of all the Indicas. A profuse bloomer with deep water-melon-pink flowers.

PRINCE OF ORANGE. Spreading grower with deep orange-red flowers a little after midseason. Very nice.

SALMON (Lawson). Known locally as "Daphne Salmon." Midseason bloomer with pleasing salmon-colored medium-sized flowers. Very hardy.

SOUTHERN CHARM. Apparently the same as Judge Solomon, but we are propagating and keeping these two varieties separate until tested further.

VIOLACEA RUBRA. Beautiful shade of wine-red color with dark green leaves.

VITTATA FORTUNEI. Fast, upright grower, with pale-colored leaves. White and lavender variegated and light lavender flowers intermixed. Starts blooming in fall and continues all winter and spring.

AZALEAS IN MEMORIAL PARK

The Azalea Trail,

Several American cities have the distinction of being identified with a particular flower that is widely planted and loved in the district. But perhaps no city is more famous for a certain plant than is Mobile for its Azaleas.

Azaleas were first brought to Mobile by an early French settler but it was not until 1929 that the Mobile Junior Chamber of Commerce organized the Azalea Trail and the citizens began a planting program that has brought most colorful results. Now each year thousands of visitors come to see the magnificent display. The Trail begins in the heart

PARK, MOBILE, ALABAMA

Mobile, Alabama

of the city under spreading moss-covered oaks and sweeps westward along 17 miles of Mobile streets. A high point of the Trail is the breath-taking beauty of the famous Bellingrath Gardens, 20 miles south of the city. Here giant oaks form a setting for acres of Azaleas and Camellias, making this estate truly "The Charm Spot of the Deep South."

The Azalea Trail is conducted as a non-profit civic enterprise and everyone interested is invited to write to Mobile's Azalea Trail, Inc., P.O. Box 1489, Mobile 8, Ala., for dates when bloom is expected to be at its height.

AZALEA, Sweetheart Supreme

PERICAT AZALEAS

The Pericat group of Azaleas is relatively new to this section of the country, but we believe they will be extensively propagated and marketed in the future, for they have proved to be very satisfactory both for landscape work and for pot plants. These Azaleas are about as hardy as the Kurume varieties, and it has been found that they will grow and thrive in some sections, such as the southernmost part of Florida, where the Kurumes do not seem to do very well.

GARDENIA SUPREME. Flowers white, sometimes with blush in center. The formation of the bloom is like a small gardenia. Good foliage and a vigorous grower.

MADAM PERICAT. Hose-in-hose, light pink flower. Late bloomer and a fast grower; very showy.

PINK PERICAT SPORT. Identical to Madam Pericat, except that flowers are a soft, deep rose color.

SWEETHEART SUPREME. The medium-sized, blush-pink, hose-in-hose flowers resemble a Sweetheart rose. An excellent grower of compact habit, with dark green foliage.

Prices of Pericat Azaleas:

4 to 6 in., transplants.....	\$11 00
4 to 6 in., budded.....	40 00
6 to 8 in., budded.....	50 00
8 to 10 in., budded.....	70 00
10 to 12 in., budded.....	90 00

CAMELLIA SASANQUA, CLEOPATRA

CAMELLIA SASANQUA

One of the newer and finest of all the broad-leaved evergreens. Similar to *Camellia japonica*, but looser and faster growing. Very profuse bloomers, the flowers commencing to open the latter part of September and continuing on through November—a time when very few flowers can be had.

Sasanquas are very hardy and can be grown without protection in the latitude of Memphis, Tenn., Birmingham, Ala., Atlanta, Ga., Charlotte, N. C., and even much farther north along the Atlantic seaboard. They are extremely satisfactory in landscape work, as individual specimens, in foundation plantings, and for hedges, and their popularity is only just beginning.

ANNETTE (No. 5 Variegated). A two-toned variety, similar to Cinderella but more dense in growth and the flowers are a much deeper shade of pink.

CINDERELLA (No. 2 Variegated). Rather dense, rapid grower of pyramidal habit, with handsome, single, two-toned flowers which are white in center and shade to pink at the ends of the petals. Very early.

CLEOPATRA. Large, beautiful cherry-red flowers, often double, and having crinkled petals. Foliage thick, dark and glossy. A vigorous and compact grower.

DAWN (Akebono). Flowers large, single to semi-double, ivory-white changing to flesh-pink at the margin of the petals. Extremely hardy and blooms continue long after other Sasanquas are over. A fine addition to our list.

CAMELLIA SASANQUA, OLEIFERA

CAMELLIA SASANQUA, continued

MINE-NO-YUKI (Snow on the Mountain). The large, double, white flowers resemble a carnation and are borne in such profusion as to literally cover the entire plant.

NEGISHEKO. Flowers very large, single, deep pink and very showy. Strong, upright grower with dark glossy foliage.

ROSEA. A graceful and upright grower with very large single flowers of brilliant pink.

SETSUGEKKA. A variety of great beauty and merit. The large, semi-double flowers are pure white, with just a touch of pink at the ends of the slightly ruffled petals. The plant is erect and compact in habit, with dark, handsome foliage. Very valuable.

SHISHIFUKUJIN. Very strong, upright grower with fine foliage. Very large, soft pink bloom, sometimes double. An extremely fine landscape plant.

TEXAS STAR. A new variety. Very upright and columnar like Italian Cypress. Good size, light mauve-pink flowers.

12 to 18 in., grafts.....	\$3 00
18 to 24 in., grafts.....	4 00
2 to 3 ft., grafts.....	5 00

CHOJIGURUMA. Flowers resemble a miniature Prof. C. S. Sargent Camellia; rose-pink. Very unusual variety.

DAYDREAM. A very fast, upright grower with very glossy foliage. Large, pink-white bloom.

HINODE-GUMO. Very large, white blooms, margined pink, with wavy petals.

OLEIFERA. Very large white, with crinkled petals edged deep pink. Extremely fast grower.

PAPAVER (Rosea Papaver). Very light pink, single, bell-shaped flower, with 8 petals. Extremely early bloomer.

USU-BENI. Semi-double to loose peony-form flowers of soft orchid-pink, with some white variegation. Leaves unusually dark green and crenulated.

MAGNOLIA
SOULANGEANA

←
MAGNOLIA
LENNEI

ORIENTAL MAGNOLIAS

Some of the most beautiful flowering trees in the world belong to this group of deciduous Magnolias. Most of them are hardy in nearly all parts of the United States, and planting of these beautiful trees should be encouraged by nurserymen.

ALBA SUPERBA. Similar to Soulangiana with almost white flowers of larger size. Rounder leaves and a more upright grower.

PINK ALBA SUPERBA. Identical to the above in form and growth habit, but with deep pink flowers.

ALEXANDRINA. Flowers large, dark purplish pink outside and white inside. Very showy and desirable.

LENNEI. Leaves are much larger than Soulangiana. Cup-shaped, larger, bold flowers, which open later than other Soulangianas, deep reddish purple outside and white inside. Very choice.

LOMBARDY ROSE. Large flowers, lower surface of petals colored dark rose, upper surface white. A seedling of Lennei but faster growing and freer blooming, many of the blooms opening in midsummer.

RUSTICA RUBRA. Large, cup-shaped, dark reddish purple flowers, similar to Lennei, and with handsome seedpods more than 6 inches long. It is a vigorous grower and especially desirable where a tall spreading Magnolia is wanted. Blooms later than Soulangiana.

ORIENTAL MAGNOLIAS, *continued*

SOULANGEANA. Small tree with large, 9-petal, pinkish flowers before the leaves in the spring. One of the most beautiful flowering trees.

Prices of preceding seven Magnolias:	Each	10	100
12 to 18 in., C.T.	\$0 45	\$4 00	\$35 00
18 to 24 in., C.T.	50	4 50	40 00
2 to 3 ft., B&B.	2 00		
3 to 4 ft., B&B.	3 00		

LILLIPUTIAN (Small-flowering Soulangeana). A miniature Soulangeana in growth habit and bloom. Very fine for the small home where space is limited and a small flowering tree is needed.

LILIFLORA (*M. oborata*). Tulip-shaped, large, purplish pink flowers before leaves appear. Many stems from ground and makes a large bush.

NIGRA. Blooms later than Soulangeana and is darker in color.

Prices of above three Magnolias:	Each	10	100
12 to 18 in., C.T.	\$0 40	\$3 50	\$30 00
18 to 24 in., C.T.	45	4 00	35 00
2 to 3 ft., B&B.	2 00		
3 to 4 ft., B&B.	3 00		

GRACE McDADE (Large White). One of our seedlings. The flowers are very large, almost double the size of Soulangeana, and are white with pink at base of petals. Fast grower. One of the finest of all Magnolias.

	Each	10	100
2 yr., C.T.	\$0 60	\$5 50	\$50 00

OSMANTHUS Fortunei. Tea-Olive. Hardy south of Washington, D. C. Beautiful holly-like leaves and fragrant white flowers in late fall. One of the best broad-leaved evergreens.

O. fragrans aurea. Yellow-flowering Sweet Olive. Similar to Sweet Olive, but a more profuse bloomer. Orange-colored flowers which are highly scented. Blooms only once in fall, however. Very new and rare plant.

O. fragrans. Sweet Olive. Similar to above two kinds but blooms almost continuously all winter and is very fragrant. We have this year a splendid lot of lining-out plants to offer.

Prices of all Osmanthus:

	10	100
6 to 8 in., C.T.	\$1 50	\$12 50
8 to 12 in., C.T.	1 75	15 00

PHOTINIA glabra. A very handsome, hardy, evergreen shrub which will grow to a height of about 15 feet. The new foliage is wine colored and is very attractive among other evergreens during the growing season. Should be clipped often to induce more new growth.

	Each	10	100
6 to 8 in., C.T.		\$1 25	\$10 00
8 to 12 in., C.T.		1 50	12 50
12 to 18 in., C.T.		1 75	15 00
18 to 24 in., B&B.	\$1 00		
2 to 3 ft., B&B.	1 25		
3 to 4 ft., B&B.	1 75		

PITTOSPORUM Tobira. A splendid evergreen shrub with shiny dark green foliage. Can be pruned to any desired size or shape and does well in sun or shady places.

	10	100
6 to 8 in., C.T.	\$1 00	\$8 50
8 to 12 in., C.T.	1 25	10 00
12 to 18 in., C.T.	1 50	12 50

PYRACANTHA FORMOSANA

PYRACANTHA coccinea Lalandi. Winter-berried plants are getting more popular all the time, and especially Pyracanthas. This variety is very hardy and safe south of Philadelphia. Orange-colored berries after August.

P. formosana. By far the showiest of all Pyracanthas, but is not very hardy, and unsafe north of Montgomery. Large clusters of bright red berries.

P. yunnanensis. Spreading type with coral-red berries. Quite hardy. Very popular.

Prices of all Pyracanthas:

	10	100
6 to 8 in., C.T.	\$1 25	\$12 50
8 to 12 in., C.T.	1 50	15 00
12 to 18 in., C.T.	1 75	17 50

VIBURNUM macrophyllum. Small tree with large, very glossy leaves and clusters of white flowers.

V. odoratissimum. Similar to above, with more rounded leaves of lighter color and not glossy. Looks much like English laurel and is a fast grower. Each

	10	100
6 to 8 in., C.T.	\$1 25	\$10 00
8 to 12 in., C.T.	1 50	12 50
12 to 18 in., C.T.	1 75	15 00
2 to 3 ft., B&B.	\$1 50	

V. suspensum. Dwarf-growing, compact bush, with clusters of suspended white flowers in late fall.

V. Tinus. Laurestinus. Compact-growing shrub with small, shiny leaves and clusters of pinkish white flowers at terminals of shoots during winter months.

	10	100
6 to 8 in., C.T.	\$1 25	\$10 00
8 to 12 in., C.T.	1 50	12 50

PFITZER JUNIPER

CONIFERS

Abbreviations: S., Seedling; C., Cutting; T., Transplanted;
B&B., Balled and Burlapped

CEDRUS Deodara.	Each	10	100
6 to 8 in., S.....	\$1 50	\$12 50

Liriope Muscari variegata

MISCELLANEOUS PLANTS

LIRIOPE <i>Muscari densiflora</i> .	Big Blue Liriope.	Similar to Ophiopogon but with much broader and longer leaves (about 12 inches) and larger spikes of blue flowers. Excellent for edging and porch-plants.	10	100
Medium clumps.			\$2 50	\$20 00
L. Muscari variegata.	Variegated Big Blue Liriope.	A variegated form of Densiflora, having leaves beautifully striped with creamy white. Pretty spikes of blue flowers in July and August make these very attractive as outdoor or potted plants.	10	100
Medium clumps.			\$2 50	\$20 00
OPHIOPOGON <i>japonica</i> .	Dragon's-Beard.	A very low, grass-like evergreen with spikes of purple flowers, doing well either in dark shade or in full sun. Very valuable as border plants and for ground-cover.	100	
Small division.			\$3 50	
Large division.			4 50	
ROSA <i>Rouletti</i> .	Very dwarf form of Rose which is evergreen in the Lower South, with small rose-pink flowers almost continuously. Quite a novelty as pot or rock-garden plants. All our plants have flower buds.	Each		
12 to 15 in., B&B			\$0 75	
15 to 18 in., B&B			1 00	

HEMEROCALLIS

The Hemerocallis or Daylily seems to be growing in popularity faster than any other perennial. We offer here a few choice varieties.

DOROTHY McDADE. (H. P. Sass.)	Pure yellow with deep tubular-shaped blooms. Late.	40 in...	\$20 00
FAREWELL. (McDade.)	Sepals of cadmium-yellow sprinkled with gold dust. The wide cerise-colored petals are slightly fluted. Branching is excellent, with many flowers blooming at the same time. Very late.	30 in...	15 00
HAROLD PATTERSON.	Pink and apricot blend. Tall growing. Very late.		15 00
JEAN. (McDade.)	Award of Merit, 1951. A most sensational bicolor with very brilliant and rich contrasting colors. Brick-red petals with a medial yellow band; rich orange sepals with yellow-orange throat. Curly, fluted petals. Late.	50 in...	40 00
JEAN LAFITTE. (Claar.)	Lovely wide petals and sepals of deep, velvety garnet, veined rose-ebony and shading to rose-ebony just before blending with nugget-bronze at the top of the cool chartreuse-green throat. Repeats.	36 in...	100 00

HEMEROCALLIS, continued

LITTLE CHERUB. (Claar.)	This very early yellow is a delight for the rockery or low border. The beautiful clear yellow flowers are full and well shaped, with segments overlapping.	15 in...	\$100 00
MARTIE EVEREST. (McDade.)	Very showy, large, spidery shaped, bright red and yellow. Late.	40 in.....	20 00
MAYOR STARZYNSKI. (Traub.)	Glistening bronzy rose. Midseason.	50 in.....	15 00
MIKADO. (Stout.)	Golden orange, flower banded with dark mahogany-red. Repeats.	30 in.....	10 00
NEON. (Wood.)	Very vivid and star-like, with petals of moroccan-red and sepals of Florida-gold. Low growing and fairly late.	30 in.....	25 00
PLUM MIST. (Claar.)	Large open flowers of plum color with a smooth velvety finish. Shallow cup of light chrome-yellow. Retains its rich coloring in the hot sun. Repeats in the South.	40 in.....	125 00
RED BIRD. (Stout.)	Petals even-toned vermillion-red with ox-blood eye and yellow-green throat. Petals recurved and semi-full. Midseason.	36 in..	25 00
WHIPPOORWILL. (McDade.)	Spanish-yellow, evenly colored self. Beautiful trumpet-shaped blooms of good size. Fragrant. Very late.	36 in...	25 00

SEMMES, ALABAMA

CAN STOCK READY FOR IMMEDIATE DELIVERY

In recent years there has been a steady trend toward Garden Stores, both as separate units of nurseries and in department stores. These container-grown plants are particularly adapted to this cash-and-carry trade, as well as serving the purpose of prolonging the season. As there is no disturbance of the roots, they can be planted any time of the year as long as water is available. We are growing well over 600,000 cans per year with a good assortment, as you will find listed below. These are practically all grown in the Plantainers, which are crimped tapered cans and knock out exactly as a clay pot, but due to the very light weight there is quite a saving in shipping cost. We will be very happy to quote rates to any point in truck load lots. For example, in the one-gallon size we load 4200 to 4400 cans on a large tandem trailer, resulting in a very low cost per each for delivery.

The stock listed below we offer in one-gallon containers at 50c each

Abelia, Edward Goucher	Juniperus chinensis Pfitzeriana (Blue Type)
Arborvitae, Berckmann	Juniperus sylvestris
Berberis Thunbergi atropurpurea (Red Barberry)	Ligustrum erecta
Buxus japonica	Ligustrum japonicum
Catalpa	Ligustrum lucidum compactum
Cedrus Deodara	Liquidambar (Sweet Gum)
Cherry-Laurel (Heavy)	Live Oak
Cleyera japonica	Lonicera, Purple-Leaf (Heavy Sheared)
Cotoneaster, Spreading	Lonicera yunnanensis
Elaeagnus pungens	Magnolia fuscata
Elaeagnus pungens Fruit-landi	Mimosa
Euonymus patens	Nandina domestica
Eurya japonica	Osmanthus Fortunei
Feijoa Sellowiana (Heavy)	Photinia glabra
Gardenia radicans	Photinia serrulata
Ginkgo biloba	Pine, Slash
Golden Chain Tree	Pittosporum, Green
Hydrangeas, Blue	Pittosporum, Var.
Ilex Cassine angustifolia (Sheared)	Podocarpus (Japanese Yew)
Ilex crenata bullata	Pyracantha formosana
Ilex crenata microphylla	Raphiolepis japonica
Ilex crenata rotundifolia	Red Cedar
Ilex myrtifolia (Sheared)	Severinia buxifolia
Ilex repandens	Sweet Olive (Osmanthus fragrans)
Ilex vomitoria	Tallow-Tree, Chinese
Illicium anisatum	Viburnum suspensum
Jasminum floridum	Xylosma
Juniperus, Kiyono
